

Compliance and Regulatory Affairs

Krieg DeVault's Compliance and Regulatory Affairs Group is comprised of well qualified attorneys who represent and advise different health care industry groups, including but not limited to hospitals, ambulatory surgery centers, nursing facilities, pharmacies, home health and hospice organizations regarding the many laws, regulations and industry standards that govern the delivery and reimbursement of health care services. We have vast experience in developing proactive and "effective" compliance programs that will protect our clients' assets, their business relationships and their reputation. We also can make a uniquely qualified "rapid response" team available, on a case-by-case basis, to swiftly and effectively advocate for our clients in the event of an untoward complaint or incident that may result in a government audit, investigation or enforcement action that could otherwise put our clients' precious assets, business relationships and reputation in jeopardy. Whether as advocates, speakers or authors, our attorneys are nationally known, across the country, in regard to these matters.
